# THE BALLROOM

## THIS IS WHAT IS INCLUDED PER ROOM

### SOUND

Line array speaker system (Alcons) with powerful bass and full sound coverage throughout the venue — suitable for speech, presentations, background music, DJ sets, and live entertainment. Soundcheck takes place between 5:00–6:00 PM. Any other time must be approved in writing by the technical manager.

### MICROPHONES

Two wireless handheld microphones or a wireless headset microphone

### PROJECTOR AND SCREENS

High-brightness projector that delivers a clear and sharp image even in well-lit rooms. The screen is 6x3 meters, with a 16:9 format and 1920x1080 resolution, positioned approximately 3 meters above the main stage. The screen can be taken down, but not during an ongoing event

### LIGHTING

Movable and fixed lighting above the stage and along the balconies. See page 12 for specifications. A lighting technician is required for dynamic and movable lighting. Without a lighting technician, the lighting will remain static throughout the event.

### TECHNICIANS

Technician is available if needed at 1090 SEK per hour. 5 hrs minimum charge. A lighting and sound technician is required.

- 65 inch 6.500 kr
- 75 inch 7.500 kr
- LED wall Price upon request

### PROJECTOR & SCREEN

The Ballroom projector and screen are included in the venue rental.  
The screen size is 6x3 m and is in 16:9, 1920x1080.  
The projector is bright enough to be visible in a fully lit Ballroom.  
Connect your own computer via HDMI at stage right or at FOH on the balcony.

### WELCOME SCREENS

In the staircase of the glass entrance facing Berzelii Park are two screens, one when going down the stairs towards the cloakroom and one when going up the stairs towards The Ballroom.  
There are also two on the Hotel side, one in the hotel entrance and the other is one floor up, between Spegelsalen and Ljussgården.

The screens are 55" in portrait orientation, 16:9, 1080x1920.

- Still image/s or a video loop, under one minute.
- JPG or .PNG
- Name the material after the event or company name.
- For video, use .mp4. The screens do not support seamless looping, so we recommend using a loop format such as "video-still image-video-still image."

750 kr/unit

Video technician: 1090 SEK/hour, minimum charge of 5 hours

# VISUAL

SVENSKA

We supplement with technical solutions tailored to the unique elements of the event — whether we are creating a conference, gala dinner, concert, or a party. For DJ performances and/or live acts, additional costs apply for technical rider requirements, such as monitoring, DJ equipment, and similar items. please note that all prices are excluding vat

## STAFFING

We tailor the staffing to your event's design and content to ensure high production value and exceed expectations, and we recommend at least one sound and one lighting technician in the Ballroom.

**SOUND TECHNICIAN** - Specialized in audio. Required for e.g. live entertainment, a larger number of microphones, streaming, etc.

**LIGHTING TECHNICIAN** - Specialized in lighting. Required for dynamic lighting with different scenes, awards ceremonies, live entertainment, etc.

**MIC HANDLER** - Technician focused on what happens on and around the stage, for example microphone changes. Required when using many microphones or quick stage turnarounds.

**VIDEO & VISION TECHNICIAN** - Specialized in image production. Required for complex or dynamic visual flows - such as namegraphics, pre-recorded videos, etc.

**SHOW CALLER** - Keeps the show together, ensures that everything falls into place and follows the running order. Recommended for complex shows with many cues.

**HOUSE TECHNICIAN** - Ensures the operation of in-house technology if you use an external technical supplier that uses in-house technology or infrastructure- such as power, network or visual feeds.

1,090 SEK/h per technician minimum charge of 5 h. Technician staffing is calculated from the start of rigging to completion of de-rig and get out.

### WHEN USING EXTERNAL TECHNICAL SUPPLIERS AND VISITING TECHNICIANS

When external technical suppliers use their own equipment in Berns' venues, the presence of Berns technicians is required for several reasons.

Berns does not have a multidisciplinary in-house technician covering audio, lighting, and video. Therefore, a technician is required to oversee and support the visiting technical supplier.

The scope of staffing should include:

- **RIGGING** - start of event. To disconnect Berns equipment and to oversee and assist with connections of guest technical equipment.
- **OPERATION** - during event. To ensure operational reliability and be standby, in case of any unforeseen incidents.
- **DE-RIGG** - after event. Restoration of Berns disconnected equipment, to ensure that everything is functioning correctly ahead of upcoming events.  
Contact the technical manager to establish staffing suitable for your event needs.

## HARDWARE, POWER & INTERNET

### POWER

- 10A, 230V single-phase outlet	250 kr
- 16A CEE (3-phase) Incl. up to 25 meters of cable	1.500 kr

Starting fee 1000 kr and 500 kr per vertical pole.

We supplement with technical solutions tailored to the unique elements of the event — whether we are creating a conference, gala dinner, concert, or a party. For DJ performances and/or live acts, additional costs apply for technical rider requirements, such as monitoring, DJ equipment, and similar items. please note that all prices are excluding vat

### **Does it cost the same for all days if I book technical equipment for several days?**

For most items, 0.5 rental fees are charged for subsequent rental days after the first. However, for certain package prices, full rental is charged for all days, which is clearly stated in the price list and/or your technical specification.

### **Do I need to make a cue sheet with a running order?**

A clear running order is always appreciated and often necessary for planning the staffing. We therefore welcome a draft running order no later than 15 days before your event, with program items, timings and what is to be displayed on screens. Adding a schedule for microphones is preferred.

### **What do I need to think about regarding presentations?**

You are entirely responsible for your own presentation and its design. We have an AV technician who can assist you for 1090 SEK/h with a minimum charge of 5 h. If you have booked an AV technician for your event, you can simply add one hour for external consultation to the already made technician booking.

### **May I bring my own technical supplier and use the equipment available on site?**

Yes – provided that your own supplier is deemed capable of carrying out the assignment in a professional manner.

You as the customer assume liability for all equipment during your booking – remember to check the scope of your insurance.

When using an external technical supplier, you are required to book Berns technicians for the entire duration that our equipment is being used – for your and our peace of mind. See page 10, 11, 12.

### **How many technicians do I need for my event?**

We make an individual assessment ahead of each event with the goal of always exceeding both your and your guests' expectations.

The number of technicians required depends on the event's design and content – we are happy to help you plan the setup in order to optimize the staffing. As standard, we recommend at least two technicians during events in The Ballroom, one for audio and one for lighting.

### **Can you play music during the breaks?**

Absolutely! We have Berns continuously playing music loop which is included in the venue. We have agreements with STIM and Sami.

### **How long shifts can I book technicians for?**

Our goal is for technicians to work a maximum of one full working day per shift. In cases where a shift change is necessary, time is required for handover – normally 1 hour per technician. We make an assessment for each booking depending on the needs of the event

### **Is rigging and de-rigging included in the price when I book technical services?**

For add-on technical equipment, there is an additional cost for rigging and de-rigging, as the staffing is based on the total scope of your technical order.

For permanently installed equipment, such as technology included in specific rooms, there is no extra cost for rigging and de-rigging.

### **Is delivery and return included in the price if I book technical equipment?**

For rented equipment from a third party, a fee of 3000 SEK excl. VAT applies for delivery and return, unless otherwise agreed.

### **What deadlines do I need to follow?**

In order to guarantee timely delivery, we need your order well in advance of the event. The following deadlines apply:

- Booking of technicians - 15 working days
- Booking of add-on technical equipment - 5 working days
- Presentations - 1 working day
- Material for running order - 1 working day
- Original for gobo - 20 working days

Our ambition is always to help you even with shorter lead times – you are always welcome to ask

### **How do I get in contact with your technicians?**

If you have been assigned a technical coordinator, your technical manager can provide you with direct contact details.

For general enquiries – please contact us via email.

[teknik@berns.se](mailto:teknik@berns.se)

A warm welcome to Berns
